

Preliminary Remarks

Messe Stuttgart (LMS) pursues the objective of a "clean trade fair centre" during all its activities and acting as such. This also applies, in particular, to waste disposal. The measures taken to achieve this objective relate to the company's own activities and the activities of its exhibitors or exhibitors' representatives. For this purpose, it is also necessary to extend the objectives of LMS for its own activities and the agreements concluded with customers of LMS to the group of companies and persons who work on behalf of customers of LMS. If customers of LMS have given an undertaking in the concluded agreements to comply with this objective, they must also ensure that they transfer the obligations entered into with LMS to their commissioned representatives through additional agreements with the latter.

To make things more convenient, LMS provides a waste disposal service.

The following regulations apply in particular:

1. The obligation to dispose of waste shall be based on the causative principle. According to this principle, everyone shall therefore be obliged to immediately dispose of the waste which he produces at LMS. He shall therefore pay the costs for all waste disposal services which relate to his waste on his exhibition stand or on the grounds of LMS.
2. After the service partner of LMS has been commissioned to perform the waste disposal services offered by LMS, the service partner shall carry out this work.
3. Waste which has not been commissioned for disposal by the service partner of LMS may never be stored outside the rented stand areas. If, however, waste is stored in aisles or on the grounds of LMS, it shall be removed immediately by the service partner at the exhibitor's expense in return for a higher fee of 190 EUR for each commenced cubic metre. The increased fee of 190 EUR/m³ will also be levied for waste which has not been commissioned for disposal and is left by the exhibitor on the hired stand area after the end of stand dismantling.
4. Dust and shavings from sawing, milling and grinding work shall be collected using dust filter bags or dust extractors. These materials represent an increased risk of accident and fire. This provision shall apply, in particular, to any wood waste that is produced.
5. No empty cardboard boxes may be stored in the exhibition halls.
6. On the evening of any day in which exhibition stands are erected or dismantled, all waste shall be removed from the hall by 18.00.

Due to the objective of a "clean trade fair centre", these measures are also used, for example, to prevent accidents and fires. This also means that they optimise the procedures in the exhibition halls. Exhibitors are therefore obliged to comply with these guidelines, which form an integral part of the contract concluded with LMS. Exhibitors must also impose the same obligation on their representatives. If these guidelines are infringed by exhibitors or their representatives, exhibitors will be liable to LMS. Please read the Technical Guidelines of LMS in this respect.

If you have any questions regarding waste disposal, please contact our service partner directly for further information.
