

**This includes, among others:**

- Fryers
- Deep-fat fryers
- Melting units and devices
- Hot oil baths

Typical household pots and pans are excluded

**It is imperative the following information is observed:**

1. The units and devices must satisfy the requirements of the Product Safety Act of 01 Dec. 2011.
2. When heating with gas an application must also be made for a licence to operate gas cylinders.
3. The devices/units must only be operated by professional personnel.
4. Ensure through suitable measures (protective devices) that visitors cannot be endangered (e.g. by splashes from hot liquid/mass, etc.).
5. At the end of operation the device/unit must undergo controlled cooling.
6. No harmful overpressure situations can arise through the use of covers and lids.
7. If using water at the stand ensure that also in the event of a leak no water enters the heated medium.
8. The use of CO<sub>2</sub> capsules is not permitted within a radius of 1 m of open heated containers.
9. An appropriate fire extinguisher for grease fire (certified, fire class F, minimum extinguishing capacity 6) must be kept available at the stand.
